

Home Start Nutrition Support Program

Share Peace-of-Mind

Amerita's Home Start Program provides thorough evaluations and unique recommendations for patients requiring tube feeding or parenteral nutrition.

Home nutrition support therapy provides many benefits when compared to hospital admission:

- Decreased unnecessary risk of hospital acquired infections
- Reduced out-of-pocket cost for the patient
- Ability to initiate nutrition support without delays
- Convenience for the patient and their caregivers
- Comprehensive training and education materials

Customized Nutrition Needs

Amerita helps patients get the support they need in the comfort of their own homes. We believe adequate nutrition support is key to improving outcomes and decreasing complications.

Amerita's Home Start Nutrition Support Program includes:

- Customized formulations based on the patient's nutrition, electrolyte and fluid needs
- Ongoing clinical monitoring and evaluation from our team of clinicians, including pharmacists, nurses, and dietitians
- Patient participation in achieving unique goals, including transition to other sources of nutrition
- Easy-to-use ambulatory pumps with backpacks
- 24/7 clinical support, including weekends and holidays

Your Amerita team is ready to assist. Contact us today for a new patient referral.
