## Polypectomy Solutions

## POLYPECTOMY:

From a dynamic hot and cold snare with a coined distal tip to our clinically proven cold snare, we offer a product solution to accommodate a variety of needs.

## Polypectomy Solutions

## TABLE OF CONTENTS:

Product Name	Page Number
SmartBand® endoscopic mucosal resection kit	2
Endoscopic Marker	3
CoinTip™ snare	4
Histolock® resection device	4
Exacto® cold snare	5
Lariat® snare	6
iSnare® system	6
Roth Net® retrievers	7
eTrap® polyp trap	8
Reveal® distal attachment cap	8
Product Information Chart	9

### **SmartBand®**

## Endoscopic Mucosal Resection Kit

#### **SmartBand EMR Kit**

- The SmartBand EMR Kit is indicated for endoscopic mucosal resection in the upper GI tract. This device is intended for single use only.
  - Consists of a ligation handle with universal connector, loading device, flush tube, Pentax adaptor, barrel with 5 latex free bands, and the SmartSnare™ EMR Hexagonal Snare.

#### Key Features & Benefits...

- Obtains a larger tissue surface area without increasing resection depth.
- Features a controlled depth barrel designed for more consistent tissue capture.
- Offers a wider 360-degree visualization without the obstruction of bands.
- Brings visualization closer to the treatment site.

Excellent visualization prior to bands being deployed

## **Endoscopic Marker**

#### **Endoscopic Marker**

- The Endoscopic Marker is indicated for endoscopically marking lesions in the GI tract when the endoscopist anticipates the lesion will require surgical removal within 30 days.
- Provides a method of marking target tissue and lesions on the wall of a patient's stomach or colon during an endoscopic procedure. The mark provides a reference point for subsequent removal of the tissue.

#### Key Features & Benefits...

- No shake necessary Allows for stable suspension of the ink.
- Stable emulsion Does not migrate resulting in dark and permanent marks.
- Each syringe is prefilled Preparation is simplified with ready-to-use product design.
   Each syringe comes with 5ml of the marking fluid.
- Sterile The product is single use and sterile.

## CoinTip<sup>™</sup> snare / Histolock<sup>®</sup> resection device

#### CoinTip snare

- The CoinTip snare features a dynamic braided wire configuration with a coined distal tip supporting hot and cold cutting capabilities specifically for complex polypectomies like endoscopic mucosal resection.
  - Distal tip flattened to 0.010" which is achieved by the manufacturing process of "coining"
  - 0.016" snare loop wire supports grip of tissue to capture target
  - Catheter includes an internal strain relief for added support during resection to reduce buckling during tissue resection

Resection sites after use of the CoinTip snare.

#### Histolock resection device

The Histolock resection device features a stiff monofilament wire to help recruit and resect flat tissue during complex polypectomy procedures.

The Histolock device effectively resects a flat 4cm rectal polyp with precision.

14mm snare size that offers maneuverability for controlled placement and precise resection

### Exacto® cold snare

#### Exacto cold snare

- ▶ Clinically proven to achieve a significantly higher rate of complete resection, the design of the Exacto cold snare offers control and placement for a precise, clean cut when compared to traditional braided snares. ¹,²
  - Enables a clean cut with a thin wire design (0.012"/0.30mm) while maintaining its shape and stiffness
  - Features a shield shape design that maximizes its width for control and placement
  - 9mm mini snare size that facilitates polyp tissue resection without the use of cautery
  - Offers a thin, stiff catheter that decreases buckling while aiding in placement

# Lariat<sup>®</sup> snare / iSnare<sup>®</sup> system

#### Lariat snare

The multi-functional design of the Lariat snare helps address a variety of resection needs including piecemeal resection and multiple polyps.

- Three distinct shapes with multiple sizes to reduce the need to exchange snares
- Snare loop design maintains its shape and integrity after multiple resections

#### iSnare system

- ▶ The iSnare system is a family of multi-functional devices designed to help reduce procedure time by minimizing device exchanges and aiding in clinical outcomes during submucosal injection polypectomy procedures.
  - Features alternating injection needle and snare operated by a multi-functional handle
  - Enables immediate snaring to avoid cushion / bleb absorption

## Roth Net® retrievers

#### **Roth Net retrievers**

- From capturing large polyps to securing multiple polyp fragments, the Roth Net retriever is a device you can count on for consistent performance. Our all-encompassing line of retrieval nets...
  - Preserve polyp fragments and specimens for histopathology
  - Allow for durability and continued visibility through the net
  - Opens even in retroflexed position

Retrieval of large polyp with Roth Net retriever

Retrieval of multiple polyps/polyp fragments with Roth Net retriever

Roth Net retriever - select offering durability and strength across multiple passes

# eTrap<sup>®</sup> polyp trap / Reveal<sup>®</sup> distal attachment cap

#### eTrap polyp trap

- Allows for quick and accurate retrieval of multiple specimens, while safeguarding clinicians from unnecessary exposure to biomaterials.
  - Collect multiple polyps with uninterrupted suction
  - Simple transport and preservation of specimens
  - Magnifying window allows direct visualization of the collected specimen

#### Reveal attachment cap

- The Reveal distal attachment cap is designed to facilitate the endoscope's view during polypectomy procedures.
  - Helps avoid 'red out' by maintaining a constant distance between the endoscope and mucosa
  - Can be used with other polypectomy devices, including snares and needles
