

MONITORING
MADE SIMPLE.

ZywieNano™

Designed with the patient in mind.

One device for all patient's needs. The low-profile, flexible design allows for maximum patient compliance and wear time.

The ZywieNano™ can be removed and repositioned without ending the study, so monitoring is not cut short.

ZywieNano™ MCT Patch is the **world's smallest** wearable heart monitor!

DEVICE CAPABILITIES

ZywieNano™

Ability to monitor for 30 days?	Yes
Live-transmitting data?	Yes
Beat-to-beat analysis?	Yes
Full disclosure on-demand?	Yes
Notifications in near-real-time?	Yes
Customizable notifications?	Yes
Can patch be reapplied if it falls off?	Yes
Can you shower with the device?	Yes
Final report turnaround time	1-3 business days

**FASTER RESULTS,
LESS HEADACHE.**

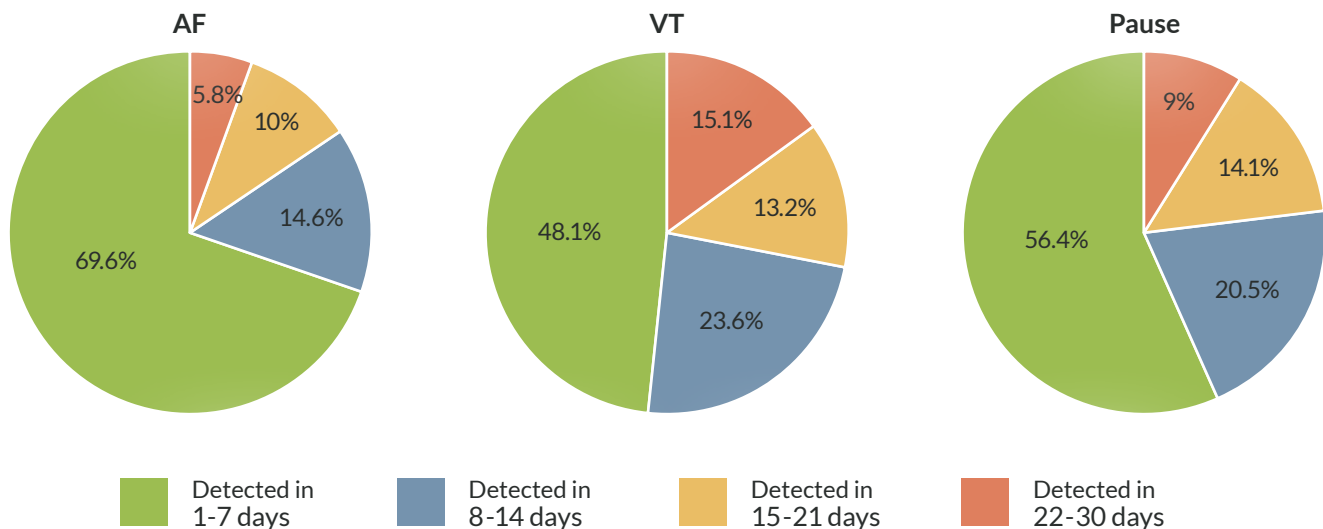

No more waiting.

Customizable notification parameters allow you to keep an eye on the clinically significant rhythms that matter to you without the hassle of irrelevant calls/faxes from your monitoring company.

Final results are available within 1-3 business days of study ending. No more waiting for the device to be returned to the company or clinic to access results.

More data, more actionable findings.

Incidence of first episode of identified arrhythmia in patients.

https://www.ahajournals.org/doi/10.1161/circ.142.suppl_3.17461

Ordering Zywie for 30 days yields a 16-28% higher detection of first AF, pause and ventricular tachycardia episode when compared to limiting monitoring to 14 days.

The results are clear; the longer you look, the more you find.
